"intelligent" cruise control system uses laser or radar to maintain a preset following distance behind another vehicle, automatically braking or
accelerating as required. Cruise control maintains a preset vehicle speed; automatically increasing or decreasing throttle to maintain that
speed.<h4 class="" vc_build_feature_name="">Safety and Security</h4><ul class="" vc_build_feature_item_list=""> An active
lane departure system alerts the driver of unintended movement of the vehicle out of a designated traffic lane and automatically maintains the
vehicle's position within that lane. The vehicle is equipped with a camera that displays an image of the area behind the vehicle on an interior
display. The camera is equipped with its own washer. Brake assist senses panic braking from the speed of the brake pedal's travel and
applies all available power brake boost.
