Safety and Security

Steering assist and/or lane centering will maintain the vehicle's position within the lane with minimal input from the driver. The driver's hands must remain on the steering wheel, or touch the steering wheel every few seconds, for the system to remain active.

The vehicle is equipped with a system that senses, and then prepares, the vehicle and/or occupants, for an impending forward collision.

Technology and Telematics

Without the need for a manufacturer specific app to be installed on the smart device, the vehicle infotainment system can access and control functions of a smart device physically plugged-into the vehicle.

AppLink/Apple CarPlay and Android Auto smart device wireless mirroring
