- Safety and Security

The vehicle is equipped with a system that senses, and then prepares, the vehicle and/or occupants, for an impending forward collision. The vehicle constantly monitors the roadway in front of the vehicle and identifies and tracks pedestrians on an interior display. If the system determines a likely impact, it will automatically take preventative steps to avoid hitting the

pedestrian.

The vehicle is equipped with a camera that displays an image of the area behind the vehicle on an interior display. The camera is equipped with its own washer.

Technology and Telematics

Without the need for a manufacturer specific app to be installed on the smart device, the vehicle infotainment system can access and control functions of a smart device physically plugged into the vehicle. Mobile devices can wirelessly connect to the internet through the vehicle's private mobile network.
