Important Package and Feature Information
Convenience

- The cruise control accesses camera, radar and/or GPS satellite data, to automatically determine if it should slow for a curve in the road ahead.

Safety and Security

- An active blind spot system helps prevent the driver from making a lane change when another vehicle is in their blind spot.
- The vehicle constantly monitors the roadway in front of the vehicle and identifies and tracks pedestrians on an interior display. If the system determines a likely impact, it will automatically take preventative steps to avoid hitting the pedestrian.
- With this system the driver's hands must remain on the wheel at all times but can be removed briefly (for a few seconds), otherwise the vehicle will prompt the driver to put their hands back on the wheel.

Technology and Telematics

- Apple CarPlay/Android Auto smart device wireless mirroring
