Option Group 01

- The cruise control system gets information from GPS navigation data so it knows when to slow down for curves.
- The cruise control system gets information from GPS navigation data so it knows when to slow down for curves.

Safety and Security

- With this system the driver's hands must remain on the wheel at all times but can be removed briefly (for a few seconds), otherwise the vehicle will prompt the driver to put their hands back on the wheel.
- The vehicle constantly monitors the roadway in front of the vehicle and identifies and tracks pedestrians

on an interior display. If the system determines a likely impact, it will automatically take preventative steps to avoid hitting the pedestrian.

Technology and Telematics

Without the need for a manufacturer specific app to be installed on the smart device, the vehicle infotainment system can access and control functions of a smart device physically plugged into the vehicle.
